

Series B8 Ball Valve

Three-Piece Ball Valve, Full Port Sizes 1/2" ~ 2-1/2"

The SVF Series B8 Ball Valves feature a high performance design for use in critical, process-quality applications. These valves exceed the pressure & temperature ratings of traditional, general purpose ball valves.

SERIES B8 DESIGN FEATURES

- Full-ported flow path in a high performance design for process-quality applications
- Encapsulated body seals to facilitate welding without disassembly
- Live-loaded stem seal ensures seal-tight pressure containment even under thermal cycling
- √ Three-piece "swing out" design offers easy access for in-line maintenance
- √ISO 5211 mounting pad for easy actuation
- √ Standard seat material is TFM1600[™]
- ✓ Blowout proof stem adds safety & reliability
- ✓ Stainless steel valves have 316L ends
- √ Full range of options to suit specific requirements
